

# What is S3 Bucket?

# Create Bucket

# Bucket Name and Region

## Create bucket [Info](#)

Buckets are containers for data stored in S3. [Learn more](#) 

### General configuration

Bucket name

1

Bucket name must be unique and must not contain spaces or uppercase letters. [See rules for bucket naming](#) 

AWS Region

2

Copy settings from existing bucket - optional  
Only the bucket settings in the following configuration are copied.

# Choose the ACLs enabled option

## Object Ownership [Info](#)

Control ownership of objects written to this bucket from other AWS accounts and granted using access control lists (ACLs). Object ownership determines who can specify access to objects.

- ☐ **ACLs disabled (recommended)**  
All objects in this bucket are owned by this account. Access to this bucket and its objects is specified using only policies.

- ☒ **ACLs enabled**  
Objects in this bucket can be owned by other AWS accounts. Access to this bucket and its objects can be specified using ACLs.

## Object Ownership

- ☒ **Bucket owner preferred**  
If new objects written to this bucket specify the bucket-owner-full-control canned ACL, they are owned by the bucket owner. Otherwise, they are owned by the object writer.
- ☐ **Object writer**  
The object writer remains the object owner.

 If you want to enforce object ownership for new objects only, your bucket policy must specify that the bucket-owner-full-control canned ACL is required for object uploads. [Learn more](#)

Objects (0)

Objects are the fundamental entities stored in Amazon S3. You can use [Amazon S3 inventory](#) to get a list of all objects in your bucket. For others to access your objects, you'll need to explicitly grant them permissions. [Learn more](#)

Actions

Create folder

Upload

Find objects by prefix

< 1 >

	Name	Type	Last modified	Size	Storage class
No objects					
You don't have any objects in this bucket.					
<div>Upload</div>					

# Add Files

## Upload [Info](#)

Add the files and folders you want to upload to S3. To upload a file larger than 160GB, use the AWS CLI, AWS SDK or Amazon S3 REST API. [Learn more](#)

Drag and drop files and folders you want to upload here, or choose **Add files**, or **Add folders**.

### Files and folders (1 Total, 48.9 KB)

All files and folders in this table will be uploaded.
